Who is this Guide for?

The Implementation Guide is designed to assist assessors, trainers, Registered Training Organisations (RTOs) and enterprises to deliver nationally endorsed industry training packages.

Nationally endorsed training packages are developed to meet the Standards for Training Packages (and accompanying policies) which were ratified by Commonwealth and State/Territory ministers in 2012.

As well as information relevant to all training packages, it provides specific information and advice about the history, structure, key features and application of the BSB Business Services Training Package.

What is in the Implementation Guide?

This BSB Business Services Training Package Implementation Guide provides:

- information relevant to all training packages
- specific information and advice about the history, structure, key features and application of the BSB Business Services Training Package.

The Appendices section is provided as a separate document and contains:

- lists of qualifications, skill sets and units of competency
- mapping information for qualifications, skill sets and units of competency.

What is a training package?

A training package is a set of nationally endorsed qualifications, units of competency and assessment requirements developed for a specific industry, sector or workplace. A training package:

• specifies the skills and knowledge required to perform effectively in the workplace
• provides consistent components for training, assessing or recognising skills
• enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
• promotes flexible modes of training to suit individual and industry requirements
• encourages learning and assessment in a work-related environment that leads to verifiable workplace outcomes
• may also provide support materials.

While a training package does specify workplace skills and knowledge requirements, it does not suggest how a learner should be trained. Users of training packages, such as trainers or assessors, must develop learning and assessment strategies that support the needs of their particular learners.

Components of IBSA training packages

Training packages consist of the following endorsed components:

• **Qualifications** which consist of units of competency combined into meaningful groups to meet workplace roles, and aligned to vocational qualification levels identified in the Australian Qualifications Framework (AQF)
• **Units of competency** which specify the standards of performance required in the workplace
• **Assessment requirements** which specify the performance evidence, knowledge evidence and conditions for assessment for each unit of competency
• **Credit arrangements** which specify details of existing credit arrangements between vocational and higher education qualifications in accordance with the AQF. Currently no credit arrangements exist between any IBSA training package qualifications and higher education qualifications.

Training packages may also include non-endorsed components, such as:

• **Skill sets** which are groups of endorsed units of competency that address a defined industry need or licensing or regulatory requirement
• **Companion volumes** (including this Implementation Guide) which provide support for delivery and assessment
• **User guides** which provide information about specific components.
Training package development and endorsement process

All training packages must be designed and developed to comply with the Australian Government’s Standards for Training Packages and accompanying policies, which were approved by Commonwealth and State/Territory ministers in 2012. More information about training package standards and policies is available at:

Training packages are developed to meet the training needs of specific industries and sectors. They differ from other education and training courses in that they must be created with industry involvement and extensive national consultation. They are regularly reviewed through a continuous improvement cycle, and updated to ensure they remain current and relevant. The following diagram demonstrates IBSA’s development or review process.
IBSA’s Training Package Development Process

**Scoping**
- Scoping brief, research and job role analysis
- Targeted consultation

**Initial Drafting**
- Targeted consultation with industry and other key stakeholders
- Draft initial materials

**Consultation**
- Consultation activities dependent on the scale of the project
- For example: workshops, email correspondence, phone consultations, facilitated online discussions

**Final Drafting**
- Draft final materials
- Initial quality assurance review

**Industry Validation**
- Seek industry validation of final draft; key industry support provided; peak associations; employee representatives
- Final quality assurance review

**Final Stakeholder Agreement**
- Seek State Training Authority support
- Publication of draft materials and Case for Endorsement

**Submission**
- Submit final product to Department of Education and Training for endorsement
- Product is Endorsed by Department of Education and Training

**Endorsed**
- Publish to training.gov.au (TGA)
- Advise relevant stakeholders of endorsement

© 2015 Commonwealth of Australia
Who can deliver and assess a qualification?

For the purpose of national recognition, delivery and assessment must be conducted by an RTO with the qualifications or specific units of competency on its scope of registration.

All RTOs must comply with the requirements set out in applicable national frameworks and standards. The current registering bodies, frameworks and standards, and which type of RTO they apply to, are shown in the table on the following page. Users of this Implementation Guide are advised to check the applicable standards for their particular circumstances.

More information about national standards and standards for non-referring states can be found at:

RTOs must make sure that training and assessment complies with the relevant standards. This includes ensuring that training delivery and assessment is conducted by those who:

• have the necessary training and assessment competencies
• have the relevant vocational competencies at least to the level being delivered or assessed
• can demonstrate current industry skills directly relevant to the training/assessment being delivered
• continue to develop their VET knowledge and skills, industry currency and trainer/assessor competence.

In some cases RTOs may need to use team-based or collaborative approaches to bring together all the necessary skills and knowledge to train and assess the full range of skills within a program of vocational training.

Check for specific assessor requirements in the Assessment conditions section of the assessment requirements for the unit of competency.

Overview of BSB Business Services Training Package

About the Business Services industry

The BSB Business Services Training Package covers a diverse range of industries and occupations. Business Services covers a range of cross-industry functions and services supporting the commercial activities of all industries.

Qualifications, skill sets and units of competency

The BSB Business Services Training Package contains:
• 61 AQF aligned qualifications
• 35 skill sets
• 563 native units of competency
• 73 imported units of competency.

Please refer to Appendix 1 for the full list of qualifications, skill sets and units of competency.

Mapping to previous version of the training package

Mapping information can be useful for delivery and assessment as it:
• explains the main changes between the previous and current versions of qualifications, skill sets and units of competency
• shows whether the outcomes of the previous and current versions are equivalent or not equivalent
• shows new components as well as any components removed from the training package.

Please refer to Appendix 2 for mapping information for qualifications, skill sets and units of competency for the BSB Business Services Training Package.

IBSA also recommends using the Compare Content Tool available on the training.gov.au (TGA) website for more information about specific changes. Visit https://www.youtube.com/watch?v=EjhNe3Bu0H4 to watch a video on how to use this tool.

</tbody>
</table>
Regulation and licensing implications for implementation

Regulation or licensing issues are identified in the Application section of units of competency and the Qualification description section of qualifications. If there are no requirements, the following statement will appear: No licensing, legislative or certification requirements apply to this unit/qualification at the time of publication.

Information for conveyancers

Conveyancers help prepare all legal documents involved in a real estate transaction (in WA, conveyancers are known as settlement agents). The following licensing, legislative and certification requirements apply to conveyancing qualifications in this training package.

Minimum qualifications or competencies required

Conveyancers must be either qualified legal practitioners or hold BSB52015 Diploma of Conveyancing with the following units:

- BSBLEG415 Apply the principles of contract law
- FNSACC403 Make decisions in a legal context
- BSBCNV501 Take instructions in relation to a transaction
- BSBCNV502 Read and interpret a legal document and provide advice
- BSBCNV503 Analyse and interpret legal requirements for a transaction
- BSBCNV504 Prepare legal documents
- BSBCNV505 Finalise the conveyancing transaction
- BSBCNV506 Establish and manage a trust account
- FNSINC401 Apply principles of professional practice to work in the financial services industry
- plus 4 elective units.

Independent conveyancing contractors need to complete the following two sectoral units to be licensed with the Business Licensing Authority:

- BSBCNV601 Identify and conduct searches
- FNSORG601 Negotiate to achieve goals and manage disputes.

Relevant legislation and regulatory requirements

Legislative and regulatory requirements differ between States and Territories in Australia, and are subject to change. RTOs are responsible for ensuring that delivery and assessment incorporates the appropriate requirements.

**Commonwealth**
- A New Tax System (Goods and Services Tax) Act 1999
- Age Discrimination Act 2004
- Anti-Money Laundering and Counter-Terrorism Financing Act 2006
- Australian Human Rights Commission Act 1986
- Australian Prudential Regulation Authority Act 1998
- Australian Securities and Investments Commission Act 2001
- Competition and Consumer Act 2010
- Corporations Act 2001
- Disability Discrimination Act 1992
- Fringe Benefits Tax Assessment Act 1986
- Income Tax Assessment Act 1997
- Privacy Amendment (Enhancing Privacy Protection) Act 2012
- Racial Discrimination Act 1975
- Sex Discrimination Act 1984
- Tax Agent Services Act 2009
- Taxation Administration Act 1953
- Work Health and Safety Act 2011

**State/Territory**
- Anti-discrimination: Discrimination Act 1991 (ACT); Anti-Discrimination Act 1977 (NSW); Anti-Discrimination Act 1996 (NT); Anti-Discrimination Act 1991 (Qld); Anti-Discrimination Act 1998 (Tas); Equal Opportunity Act 1995 (Vic); Equal Opportunity Act 1984 (WA)
- Occupational health and safety: Occupational Health and Safety Act 2004 (Vic); Occupational Safety and Health Regulations 1996 (WA)
- Trustee: Trustee Act 1958 (Vic); Trustee Act 1925 (NSW); Trustee Act 1936 (SA); Trustee Act 1962 (WA); Trustee Act 1978 (Qld)

**Regulatory authorities/Standards**
- Australian Accounting Standards Board (AASB) Standards
- Financial Reporting Council
**WHS implications in the industry**

Work health and safety (WHS) requirements are covered either by:

- embedding requirements in the elements/performance criteria of units of competency
- including specific WHS units in qualifications.

In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise units of competency by referring to the existing State/Territory occupational health and safety (OHS) legislative requirements.

**Entry requirements**

Generally individuals may commence a qualification as long as they have the knowledge, skills or experience required for entry. The table shows the qualifications in the BSB Business Services Training Package with entry requirements.

<table>
<thead>
<tr>
<th>Qualification code and title</th>
<th>Entry requirements</th>
</tr>
</thead>
</table>
| **BSB51315 Diploma of Work Health and Safety** | This qualification has entry requirements of all core units from BSB41415 Certificate IV in Work Health and Safety, or equivalent competencies. Equivalent competencies are predecessors to the following units which have been mapped as equivalent:  
  - BSBWH5402 Assist with compliance with WHS laws  
  - BSBWH5403 Contribute to implementing and maintaining WHS consultation and participation processes  
  - BSBWH5404 Contribute to WHS hazard identification, risk assessment and risk control  
  - BSBWH5405 Contribute to implementing and maintaining WHS management systems  
  - BSBWH5406 Assist with responding to incidents |
| **BSB60615 Advanced Diploma of Work Health and Safety** | All core units from BSB51315 Diploma of Work Health and Safety or equivalent competencies. Equivalent competencies are predecessors to the following units which have been mapped as equivalent:  
  - BSBWH5502 Manage effective WHS consultation and participation processes  
  - BSBWH5503 Contribute to the systematic management of WHS risk  
  - BSBWH5504 Manage WHS risks  
  - BSBWH5505 Investigate WHS incidents  
  - BSBWH5506 Contribute to developing, implementing and maintaining WHS management systems |

**Requirements for assessors**

Assessor requirements are identified in the Assessment conditions section of units of competency.

All assessors must meet the requirements set by the applicable registering body (refer to the section ‘Who can deliver and assess a qualification?’ in this Guide).

**Assessor requirements for WHS qualifications**

Assessors for BSBWH5402 Assist with compliance with WHS laws must hold a WHS qualification or equivalent at diploma level or higher.

</tbody>
</table>
Access and equity considerations

Access and equity relates to the approaches used to make sure training and assessment practices consider and respond to the individual needs of learners, so that potential learning barriers are minimised. Individual needs that could present barriers to access, participation and achievement of learning outcomes include:

- age
- gender
- cultural or ethnic background
- disability
- sexuality
- language, literacy or numeracy skills
- employment status
- geographical location.

The design and content of this training package supports equitable access and progression for all learners. It is the responsibility of the RTO delivering and assessing qualifications to:

- ensure that training and assessment processes and methods do not disadvantage individual learners
- determine the needs of individual learners and to provide access to any educational and support services necessary.

Some practical ways that access and equity issues could be addressed include:

- modifying assessment processes and techniques for learners who are located at a distance from a campus location
- checking that materials are culturally appropriate for learners and amending, as necessary
- making sure that activities and assessments are suitable for the language, literacy and numeracy skill levels of learners (while meeting the requirements of the unit of competency).

Reasonable adjustment

A legislative and regulatory framework underpins and supports the delivery of vocational education and training across Australia. Under this framework, providers of vocational education and training must take steps to ensure that learners with recognised disabilities can access and participate in education and training on the same basis as learners without disabilities.

Sometimes reasonable adjustments, are made to the learning environment, training delivery, learning resources and/or assessment tasks to accommodate the particular needs of a learner with a disability. An adjustment is reasonable if it can accommodate the learner’s particular needs, while also taking into account factors such as: the views of the learner; the potential effect of the adjustment on the learner and others; the costs and benefits of making the adjustment.

Adjustments must:

- be discussed and agreed to by the learner with a disability
- benefit the learner with a disability
- maintain the competency standards
- be reasonable to expect in a workplace.

Adjustments are not required if they could:

- cause the RTO unjustifiable hardship
- harm other learners.

Making reasonable adjustments requires the RTO to balance the need for change with the expense or effort involved in making this change. If an adjustment requires a disproportionately high expenditure or disruption it is not likely to be reasonable.
Foundation skills

Foundation skills are the non-technical skills that support an individual’s participation in the workplace, in the community and in education and training.

In this training package (and all training packages developed by IBSA) the foundation skills incorporate the learning, language, literacy and numeracy (LLN) skills described in the Australian Core Skills Framework (ACSF), and the employability skills described in the Core Skills for Work Developmental Framework (CSfW). The skills included in these two frameworks are illustrated in the table.

Identifying foundation skills

Foundation skills that underpin competent performance are identified in each unit of competency in a foundation skills table. The foundation skills should be considered as an integrated part of the unit for delivery and assessment purposes.

The foundation skills table in each unit:
• identifies applicable underpinning skills
• lists the performance criteria numbers for each skill
• describes the application of each skill in context of the performance criteria.

The five skills from the ACSF are identified separately with descriptions identifying how the skill underpins the performance criteria. The three skill clusters from the CSfW are identified with descriptions that identify the respective skill or focus areas and how they underpin the performance criteria.

Resource and equipment requirements

RTOs must make sure that all resources and equipment required to train and assess units of competency are available.

Details of specific resources, including equipment and materials essential for assessment, are listed in the Assessment conditions sections of assessment requirements documents.
Modes of delivery

Training and assessment in simulated environments

Units of competency in the BSB Business Services Training Package may be delivered and assessed in the workplace or in a simulated environment.

To maintain the integrity of training and assessment, RTOs, trainers and assessors need to keep pace with industry technologies and ensure that learning activities and assessments accurately reflect workplace activities. RTOs will need regular contact with industry to ensure the currency and validity of all activities conducted in simulated environments.

Workplace simulation criteria

In conducting training and assessment in a simulated workplace environment, trainers and assessors must make sure that the simulated environment gives the learner the opportunity to meet the following critical criteria:

1. Quality – The work is of the standard required for entry into the industry.
2. Productivity – The work is performed within a timeframe appropriate for entry to the industry.
3. Safety – The work is performed in a manner that meets industry safety standards.

Where simulations meet these criteria, RTOs can be confident that learners are ‘work ready’ on successful completion of units of competency.

Assessing in simulated environments

Simulations must provide opportunities for integrated assessment of competence that include:

• performing the task (task skills)
• managing a number of tasks (task management skills)
• dealing with workplace irregularities such as unexpected problems, breakdowns and changes in routine (contingency management skills)
• fulfilling the responsibilities and expectations of the job and workplace, including working with others (job/role environment skills)
• transferring competencies to new contexts.

Assessment activities must be realistic and reasonable in terms of scale. Assessment conducted under simulated conditions should reflect those typically found in the workplace. The following assessment checklist can be used to make sure that some key points are considered.

To further enhance the validity of assessment process using simulation, the assessor should consider:

• assessments covering a range of interconnected units of competency
• use of assessment checklists to ensure that all required performance and knowledge evidence requirements have been met
• use of self-assessment, peer assessment and debriefing activities
• use of authentic workplace documentation.

Assessment checklist

<table>

</table>
Australian apprenticeships

Apprenticeships and traineeships are formal training arrangements between an employer and an employee that have been established by a State or Territory Training Authority (STA). STAs are the government departments in each State or Territory responsible for the operation of the VET system (including Australian Apprenticeships) within that jurisdiction. STAs establish specific industry training package qualifications which are available as apprenticeships and traineeships in each State or Territory.

The Australian Apprenticeships website offers information about traineeships and apprenticeships and includes links to the websites for STAs. Visit www.australianapprenticeships.gov.au for more information.

VET in schools

VET in schools (VETiS) provides for nationally recognised vocational education and training to be undertaken as part of a senior secondary certificate.

Successful completion of a VETiS program enables students to gain a nationally-recognised AQF qualification, usually at the same time as their school-based qualification.

VETiS programs are packaged and delivered in a variety of ways across Australia. There are three main types of delivery arrangements for VETiS programs:

- schools can be an RTO in their own right
- school sectoral bodies (such as Boards of Studies or regional offices) can hold RTO status on behalf of a group of schools
- schools can work together in partnership with an RTO.

In some State and Territory school systems, students who work part-time in an appropriate workplace may use this to fulfil work placement requirements. Virtual or simulated work placements may also be legitimate.

Training and assessment issues for schools

Implementation of the BSB Business Services Training Package within the school sector, while encouraged, needs to ensure:

- the currency of skills and knowledge of those who train and assess students
- access to industry-current equipment, facilities and training resources so that students acquire a realistic view of the realities and conditions within the workplace
- comprehensive coverage of foundation skills, performance requirements and knowledge requirements as described in the unit and assessment requirements documents for each unit of competency
- current and realistic learning and assessment experiences.
The following table lists the *BSB Business Services Training Package* qualifications that are recommended for delivery in a VETiS program.

RTOs are advised to check requirements with the relevant authorities in their State/Territory.

Legal considerations for learners in the workplace/on placements

Legal requirements that apply to specific industries and VET vary across each State and Territory, and can regularly change. Contact the relevant State or Territory Department/s to check if legal requirements apply.
What is a qualification?

Qualifications are created by grouping units of competency into combinations that meet workplace roles. Qualifications come with ‘packaging rules’ which set out the overall requirements for delivering the qualification, for example, the number of core units; number and source of elective units.

Qualifications are aligned to Australian Qualifications Framework (AQF) qualification types. Vocational Education & Training (VET) qualifications are at levels 1, 2, 3, 4, 5, 6, and 8 of the AQF.

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the VET sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

For a full explanation of the AQF, see the AQF website: http://www.aqf.edu.au

Qualifications in the BSB Business Services Training Package version 1

Please refer to Appendix 1 for a list of qualifications.
## Qualification structure

Qualifications are based on templates prescribed by the NSSC Standards for Training Packages 2012. The table explains the contents of each field for qualifications in this training package.

### Qualification code

Each qualification has a unique eight-character code:
- the first three characters identify the training package
- the first number identifies the qualification level
- the next two numbers identify a qualification’s position in the sequence of qualifications at that level
- the last two numbers identify the year in which the qualification was endorsed.

For example:

```
<table>
<thead>
<tr>
<th>Business Services Training Package</th>
<th>Example</th>
<th>This qualification was endorsed in 2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSB40215</td>
<td>BSB40215</td>
<td></td>
</tr>
<tr>
<td>AQF level 4</td>
<td></td>
<td>This is the 2nd qualification in the sequence at this AQF level</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
```

### Qualification title

The title reflects the qualification outcomes and complies with the length specified in the AVETMIS standard (no more than 100 characters).

### Qualification description

This field describes the qualification outcomes, together with any licensing, legislative, regulatory or certification considerations.
### Entry requirements

This is an optional field that specifies any mandatory entry requirements.

### Packaging rules

This field:
- specifies the total number of units of competency required to achieve the qualification
- specifies the number of core and elective units
- lists all core and elective unit codes and titles, including prerequisite units where they apply.

### Qualification mapping information

This field specifies the code and title of any equivalent qualification.

### Links

This field provides a link to the Companion Volume Implementation Guide.
Qualification pathways and occupational outcomes

A pathway is the route or course of action taken to get to a destination. A training pathway generally means the learning activities or experiences used to attain the competencies needed to achieve career goals. There is no single pathway that applies to everyone; each individual has specific needs and goals.

Achievement of AQF qualifications provides opportunities for individuals to pursue and achieve their career goals. Qualifications can be achieved in various ways, including:

• off-the-job training, e.g. attending classroom-based learning programs
• on-the-job training, e.g. apprenticeships, traineeships
• recognition of prior learning
• credit transfer.

The following information and charts explain possible occupational outcomes for qualifications in this training package, together with pathways between qualifications.
Business / Administration Pathway

- BSB60215 Advanced Diploma of Business
- BSB50215 Diploma of Business
  - BSB50415 Diploma of Business Administration
- BSB40215 Certificate IV in Business
  - BSB40515 Certificate IV in Business Administration
- BSB30115 Certificate III in Business
- BSB30415 Certificate III in Business Administration
- BSB31115 Certificate III in Business Administration (Medical)
- BSB31015 Certificate III in Business Administration (Legal)

Recordkeeping Pathway

- BSB60815 Advanced Diploma of Recordkeeping
- BSB51715 Diploma of Recordkeeping
- BSB41715 Certificate IV in Recordkeeping
- BSB30815 Certificate III in Recordkeeping
- Key Recordkeeping Skill Set
Selecting electives for different employment outcomes

The qualifications include elective units that should be selected according to the learning and pathway needs of the learner. The choice of elective units is generally negotiated between the learner and/or employer, and the RTO conducting the training program.

Electives can be selected from within the training package, from other training packages and from accredited courses.

IBSA recommends that elective units should be used to provide a vocational focus for the qualification and should be relevant to the:

• qualification level
• job role
• work outcomes
• local industry needs.
What is a skill set?

Skill sets consist of one or more endorsed units of competency that have been packaged together to address a defined industry need or specific licensing or regulatory requirement. Skill sets are not qualifications.

Skill sets in the BSB Business Services Training Package version 1

Please refer to Appendix 1 for a list of skill sets.
## Skill set structure

Skill sets themselves are non-endorsed components of training packages (however, they consist of endorsed units of competency). Skill sets use a standard format developed by IBSA. The table explains the contents of each field.

<table>
<thead>
<tr>

Units of competency

What is a unit of competency?

Units of competency are the nationally agreed statements of the skills and knowledge required for effective performance in a particular job or job function. Units of competency describe work outcomes as agreed by industry. As such, they do not describe the procedures necessary to perform a particular role, but rather, identify the skills and knowledge, as outcomes, that contribute to the whole job function. Each unit of competency describes:

- a specific work activity and what it involves
- particular skills (and level of skills) that are needed to perform the work activity
- conditions under which the work activity may be conducted
- knowledge and skills required to perform the work activity
- foundation skills required to perform the work activity
- how learners can show they are competent in the work activity
- performance and knowledge evidence that must be considered in assessing competency of the unit
- conditions under which evidence for assessment must be gathered.

Units of competency are not aligned to levels within the AQF because units of competency can be included across a range of qualification levels. However, the qualification in which a unit is first packaged in a training package is indicated in the unit code.
What is competency?

The broad concept of industry competency is the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency covers all aspects of workplace performance and involves:

- performing individual tasks
- managing a range of different tasks
- responding to contingencies or breakdowns
- dealing with the responsibilities of the workplace, including working with others.

Workplace competency is the ability to apply relevant skills and knowledge consistently over time and in the required workplace situations and environments.

Competency standards are determined by industry to meet industry skill needs and focus on what is expected of a competent individual in the workplace.

Units of competency in the BSB Business Services Training Package version 1

As well as native units, a range of units of competency have been imported into the BSB Business Services Training Package to provide greater flexibility, choice and transferability of skills within the industry.

Please refer to Appendix 1 for a list of units of competency. This includes:

- units of competency native to this training package
- imported units of competency
- units of competency with prerequisites.
# Unit of competency structure

Units of competency are based on templates prescribed by the NSSC Standards for Training Packages 2012. Under these Standards, a unit of competency comprises two separate documents, i.e. a unit of competency document and an assessment requirements document. The tables explain the contents of each field.

## Unit of competency

### Unit code

Each unit of competency has a unique code, which is assigned when the training package is endorsed, or when new units of competency are added to an endorsed training package:

- the first three characters identify the training package
- the next three characters indicate the competency stream or group
- the first number indicates the AQF qualification in which the unit is first packaged
- the next two numbers identify a unit’s position in the sequence of units in that competency stream or group.

**Example**

BSBADM409

This is the 9th unit in the sequence in the Administration stream

This unit was first packaged within a Certificate IV

### Unit title

The title describes the unit outcome and complies with the length specified in the AVETMIS Standard (no more than 100 characters).

### Unit application

This field describes how the unit is practically applied, who would typically use it and the unit of competency’s relationship to licensing, legislative or certification requirements.

### Prerequisite units

This is an optional field that specifies any unit(s) in which the learner must already be competent prior to the achieving competency in this unit.
### Unit sector
This field is used to categorise units of competency in relation to industry sectors or types of work.

### Elements of competency
Elements of competency describe the outcomes of the significant functions and tasks that make up the competency. Elements describe actions or outcomes that are demonstrable and assessable.

### Performance criteria
Performance criteria specify the required performance in relevant tasks, roles, skills (including foundation skills) and the applied knowledge that enables competent performance.

### Foundation skills
This field describes the language, literacy, numeracy and employment skills that are essential to performance.

### Range of conditions
This is an optional field that specifies different work environments and conditions that may affect performance. Range is restricted to essential operating conditions and any other variables essential to the work environment, so it is quite different from the previous Range statement.

### Unit mapping information
This field specifies the code and title of any equivalent unit of competency.

### Links
This field provides a link to the Companion Volume Implementation Guide.

Contextualisation of units of competency by RTOs

RTOs may contextualise units of competency to reflect local skill needs. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, or specific enterprise requirements. Any contextualisation must ensure the integrity of the outcome of the unit of competency is maintained.

Industry requirements, as described in training or job specifications, can be used to contextualise a unit of competency.

About IBSA

This Guide has been developed by Innovation and Business Skills Australia (IBSA). IBSA is a national organisation working closely with industry to identify skill needs and to develop training products and services to fill those needs.

IBSA is authorised and funded by the Australian government to produce training packages for its six industries:

• Business services
• Financial services
• Information and communication technologies
• Cultural industries
• Printing and graphic arts
• Education and training.

Visit www.ibsa.org.au for more information.
These materials were developed by Innovation & Business Skills Australia in association with the Commonwealth Government through the Department of Education and Training.
